

# Affordable remote power monitoring

Avoid the nasty issues that can arise from power becoming disconnected at your remote location...

## It's annoying

Food spoilage is costly and causes unpleasant odours which are difficult to remove.

## It could ruin your batteries

Flat batteries never fully recover. Given the cost of batteries, we all want them to last as long as possible.

## It could be a nightmare

If your boat power is off and the batteries run flat, your bilge pump will not work.

## It could destroy your stock

A power cut could wipe out your entire inventory, costing you thousands.

# NoPowerTXT

[www.nopowertxt.com](http://www.nopowertxt.com)

Everything you need  
to monitor remote  
power in one neat  
package...

-  Cellular phone and charger
-  NoPowerTXT pre-loaded
-  12 months NoPowerTXT service
-  Easy step-by-step guide

## Now you can have a feature-packed power monitoring system at an affordable price

NoPowerTXT is a complete solution... just leave the supplied phone connected to its charger, plugged in to any power outlet. If the power is disconnected, NoPowerTXT will send a text message to your everyday cellular phone... it's that simple.

-  Notify one or multiple people
-  Delayed "power off" and "power on" alerts avoid unnecessary text messages
-  Reminders to ensure alerts aren't forgotten
-  Regular text status updates so you know everything's OK
-  Turn on and off remotely
-  On-screen event logging

Visit our website to find out more about these and many other user-friendly features
